S'MORE
FOR YOUR 64
61,183 delicious bytes for your Commodore 64
S'MORE Memory!
S'MORE Power!
S'MORE Fun!

cardco, inc.
S'MORE features
• 61,183 bytes of C-64 RAM memory freed for Basic programming (57% more than the 38,911 now free). This gain is not restricted in any way, and can be used for arrays, variables, and basic programs which would overload the un-expanded C-64's capacity
• Over 60 new and enhanced basic commands & functions including programming aids like CATALOG (view disk directory), program re-NUMBER, and OLD (ud-do a NEW)
• Function keys pre-programmed (or can easily be user defined)
• Full error trapping, and an automatic error help which lists the error line and places a flashing cursor at the beginning of the program statement containing the error
• Full command selection including relative file commands (DOPEN# and RECORD#), structured formatting commands (DO LOOP, etc.), and print using & formatting tools (PRINT USING & PRINT AT for row, col.)
• No peeks or pokes because S'MORE provides direct access to normally peeked/poked items with commands like BORDER, PAPER, INK
• Full up-down scrolling through program listings for easier program editing.

S'MORE
FOR YOUR 64

61,183 delicious bytes for your Commodore 64

longgonegeek

S'MORE Memory, S'MORE Power, S'MORE Fun!

Now, 61K available memory
S'MORE frees up 61,183 bytes of C-64 RAM memory for un-restricted Basic programming (57% more than the standard C-64).

A bridge to C-128
The S'MORE command structure is similar to the C-128's new Basic 7.0, providing C-64 users advanced programming techniques.

S'MORE features for programming power

- Over 60 new and enhanced basic commands & functions
- No peeks or pokes (direct access to normally peeked/poked items)
- Full error trapping and automatic error helps
- Full up/down scrolling through program listings
- Structured programming
- Relative files
- Print using
- Formatted inputs
- Print at...and much, much more.
